V-Ammonium Phosphate

Mid Life Fast Action Phosphorous

NPK 13.46.0

Fortified &
Enriched with
Micronutrients

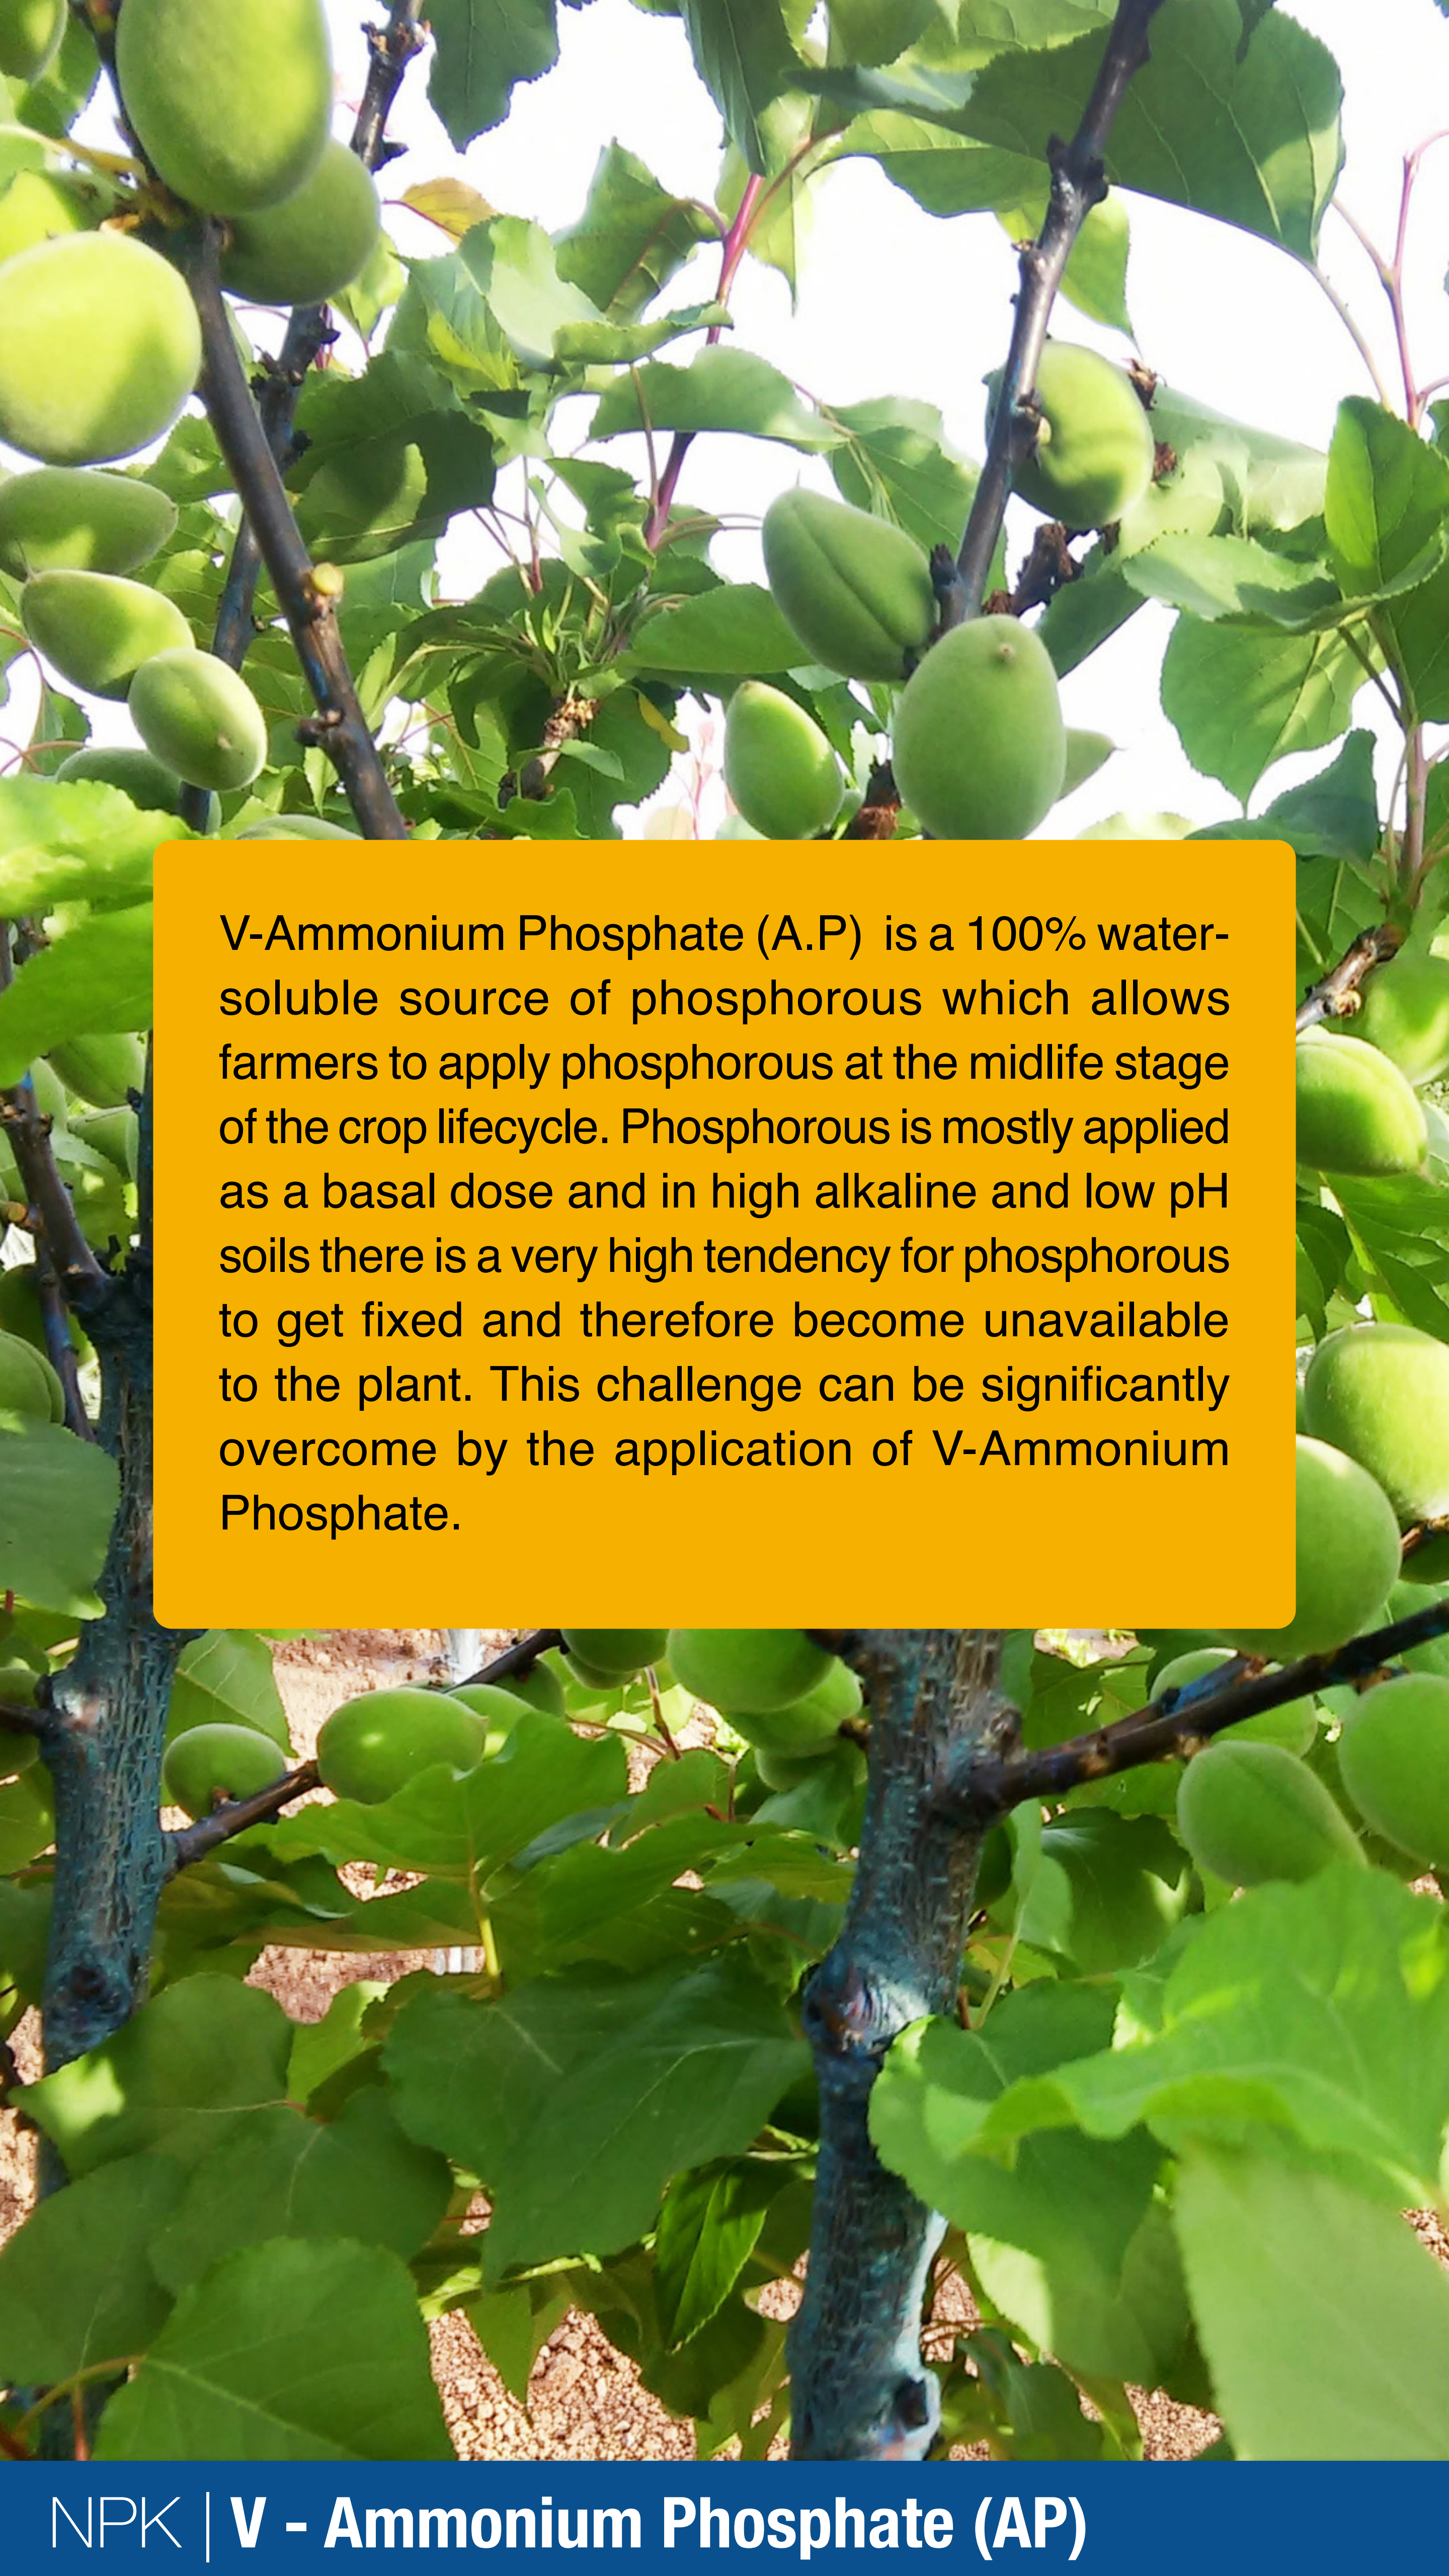

Net Weight 10 Kg

V-Ammonium Phosphate

NPK 13.46.0

**A Premium 100% Water Soluble NPK Blend.
Fortified & Enriched with Micronutrients.**

V-Ammonium Phosphate (A.P) is a 100% water-soluble source of phosphorous which allows farmers to apply phosphorous at the midlife stage of the crop lifecycle. Phosphorous is mostly applied as a basal dose and in high alkaline and low pH soils there is a very high tendency for phosphorous to get fixed and therefore become unavailable to the plant. This challenge can be significantly overcome by the application of V-Ammonium Phosphate.

Chemical Analysis

V-Ammonium Phosphate (A.P)

Macro Elements (w/w)

| | |
|-------------------------|------|
| Nitrogen (N) | 13 % |
| Phosphours (P_2O_5) | 46 % |
| Potassium (K_2O) | 00 % |

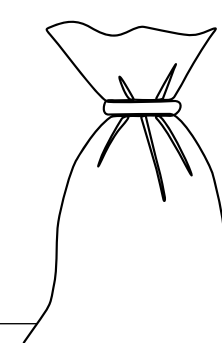

Trace Elements (ppm)

| | |
|-----------------------|-----|
| Iron (Fe) - EDTA | 260 |
| Copper (Cu) - EDTA | 75 |
| Manganese (Mn) - EDTA | 320 |
| Zinc (Zn) - EDTA | 230 |
| Boron (B) | 100 |
| Molybdenum (Mo) | 20 |

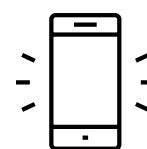

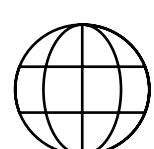

Physical Properties

| | |
|---------------------------|-------------|
| Appearance | Crystalline |
| Color | Yellow |
| Moisture (%) | < 2 |
| pH (5% solution @ 25 °C) | 4.2 |

Available in **10** Kg
