HUMI GROW

**Potassium humate made from premium
Quality lignite**

پاکستان کے رنگ۔ وائٹل ایگری کے سنگ

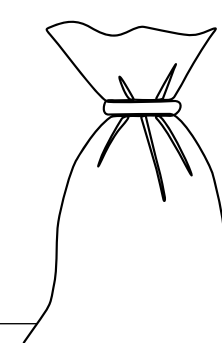

Potassium Humate is an efficient organic & potassium-based soil amendment. It improves soil structure by increasing the net negative charges thereby increasing the porosity of the soil. Humi grow is a chelating agent that binds the mineral in the soil and delivers them to the plant. It can be mixed with urea, & alkaline phosphorous fertilizers to enhance the use efficiency of these fertilizers. The typical application is one bag (25kg) per acre.

Chemical Analysis

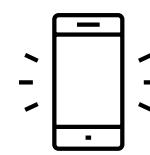

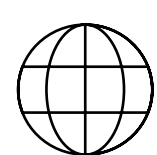

HUMI GROW

Humic Acid	40%
Potassium	7%
Sulfur	3%

Available in **8 Kg**
