

V-Liquid Potash

NPK 2.10.30

پاکستان کے رنگ۔ وائٹل ایگری کے سنگ

A novel quality, superior grade macronutrient blend rich in Potash. Ideal for both drip irrigation does not clog emitters and filters of drip systems because it has very low levels of insoluble making it an ideal choice for drip application.

Chemical Analysis

V-Liquid Potash

Macro Elements (w/w)

Nitrogen(N)	02
-------------	----

Phosphorus (P_2O_5)	10
-------------------------	----

Potassium (K_2O)	30
----------------------	----

Trace Elements (ppm)

Iron (Fe) - EDTA	280
------------------	-----

Copper (Cu) - EDTA	80
--------------------	----

Manganese (Mn) - EDTA	100
-----------------------	-----

Zinc (Zn) - EDTA	200
------------------	-----

Boron (B)	100
-----------	-----

Molybdenum (Mo)	15
-----------------	----

Physical Properties

Appearance	Liquid
------------	--------

Color	Brownish/Transparent
-------	----------------------

Moisture (%)	N/A
--------------	-----

pH (5% solution @ 25 °C)	13
---------------------------	----

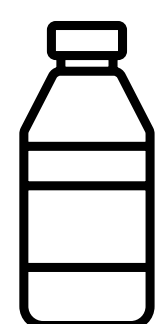

General Specifications / Typical Properties

Product Category	Soluble fertilizers
------------------	---------------------

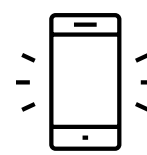

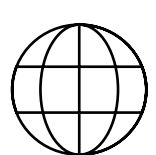

Nutrient Composition	02-10-30
----------------------	----------

Nutrients	N, P, K
-----------	---------

Available in **1** Liter | **200** Liter
