# V-Transform 21% Zinc

**Zinc in crystal form**

پاکستان کے رنگ۔ وائٹل ایگری کے سنگ

V Transform is crystalline Zinc 21%. Zinc activate enzymes that are responsible for the synthesis of certain proteins. It is used in the formation of chlorophyll and carbohydrates. It facilitates the conversion of starch to sugar. Its presence in the plant tissue helps the plant to withstand extreme weather conditions such as very hot or very cold temperatures. Zinc is essential in the formation of auxins, which helps in growth regulation and stem elongation. The typical application rate is 6kgs per acre. Zinc application with Nitrogen application is usually recommended.
