

V Zinc

Liquid Zinc 10%

پاکستان کے رنگ۔ وائٹل ایگری کے سنگ

V-Zinc is liquid Zinc sulfate containing 10% Zinc. It is a stable, non-dusting formulation that remains a clear liquid under most storage conditions. Zinc activates enzymes that are responsible for the synthesis of certain proteins. It is used in the formation of chlorophyll and some carbohydrates, conversion of starches to sugar, and its presence in plant tissue helps the plant to withstand cold temperatures. Zinc is essential in the formation of auxins, which help with growth regulation and stem elongation.

Chemical Analysis

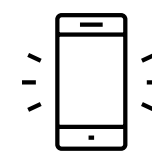

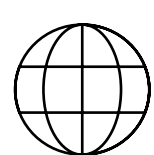

V Zinc

| | |
|--------------|-----------------------|
| Zinc | 10% w/v (100gm/Liter) |
| Amion acids | 600 PPM |
| Fulivc acids | 900 PM |

Available in **3** Liter | **20** Liter | **200** Liter
