

Green Phosphate

A balanced mix of nitrogen, phosphate and bio stimulants

پاکستان کے رنگ۔ وائٹل ایگری کے سنگ

Green Phosphate is a unique, acidic, water-soluble, value-added fertilizer phosphatic fertilizer with improved nutrient use efficiency. GP (Green Phosphate) is specially designed for basal applications. Having acidic pH, it improves phosphorus availability to plants. Finally, it is also fortified with essential micro-nutrients.

Chemical Analysis

Green Phosphate

Macro Elements (w/w)

Nitrogen(N) 6%

Phosphorus (P_2O_5) 32%

Others

Bio-stimulants & Humic 7%

Physical Properties

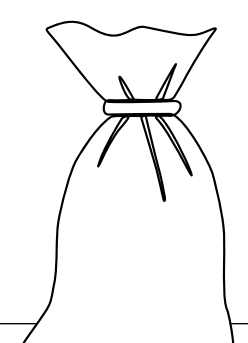

Appearance Granular

Color Light Brown

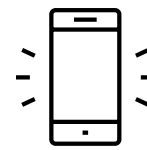

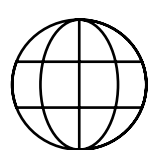

Moisture (%) $1 \pm 0.2\%$

pH (5% solution @ 25 °C) 5.5 - 6.5

Available in **25** Kg
